EDUCATION

University of Washington

Master of Science in Computer Science and Software Engineering

Sept. 2023 - Dec. 2025

GPA: 3.85/4.0

Missouri University of Science and Technology (MS&T)

Bachelor of Science in Computer Science | Minor in Mathematics

Aug. 2019 - Dec. 2022

GPA: 3.98/4.0

EXPERIENCE

Google

Seattle, WA

Cloud Software Engineer Intern

Jun. 2025 - present

- Enhancing profiling for 40+ Google Compute Engine VM instances across general purpose and slice of hardware families by extending CPUID benchmarks to include metrics such as turbo frequency and vNUMA split thresholds
- Leveraging the Google Cloud Platform, Python, and Linux to remotely execute commands on VMs for metric collection and performance diagnostics
- Authoring detailed design documentation outlining the project's background, technical strategies, and logic flow

Seagate Technology

Remote

Artificial Intelligence & Machine Learning Intern

May 2024 - Aug. 2024

- Engineered 8+ predictive models, participated in the peer review process, and learned innovative methods, algorithms and tools to predict the Remaining Useful Life for machine consumables
- Utilized SQL through DBeaver to perform complex queries and data extraction on Oracle and Trino databases, enabling efficient data exploration and supporting machine learning model development
- Received the Best Presenter Award among the global 2024 intern cohort for excellence in project presentation

Advanced Micro Devices (AMD)

Santa Clara, CA

Systems Software Engineer Intern

Jan. 2024 - May 2024

- Applied software engineering principles to create 4 Python automation scripts, resulting in a 70% reduction in setup time and improved workflow efficiency
- Collaborated with the team to determine user requirements and create features tailored to the workflow
- Created thorough documentation for the automation scripts and centralized all related resources to ensure ease of use, promote team-wide accessibility, and support continued development and collaboration

Deloitte

Arlington, VA

Technology Consultant Intern

Jun. 2022 - Jul. 2022

- Created an onboarding presentation highlighting team dynamics, communication strategies, and workflows
- Engaged with stakeholders to define project requirements and identify opportunities to adopt cloud technologies
- Facilitated cross-functional collaboration to streamline project timelines and deliver updates to senior leadership

University of Washington

Bothell, WA

Association of Computing Machinery: Core Officer

Nov. 2023 - present

- Led 4+ professional events, including mock interviews, hackathons, and networking sessions, engaging 100+ attendees to enhance student experience
- Coordinated with multiple organizations and professors to expand event reach and strengthen the community
- Presented career development insights to 40+ students, offering practical advice and developed helpful resources

Mottomo Sushi (Family-Owned Business)

Rolla, MO

Web Developer & Floor Manager

Aug. 2018 - Sept. 2023

- Designed a 3-page website for the restaurant using React.js, HTML, and CSS to showcase business information
- Successfully mitigated the issue of incorrect menus circulating online by consolidating information into one true source resulting in 0 customers reporting wrong menus
- Enhanced service quality by supervising and training 10+ employees in customer interaction and relations

Missouri University of Science & Technology

Rolla, MO

LEAD Tutoring: Tutor & Communications Officer

Aug. 2020 - Dec. 2022

- Mentored 90+ students in various subjects such as Intro to Programming and Calculus For Engineers
- Partnered with professors to craft impactful tutoring sessions, achieving a 10% score boost for 15+ students
- Promoted learning sessions via social media and posters increasing attendance to tutoring workshops by 20%

Asian American Association: Vice President

Jan. 2021 - Dec. 2022

- As a founding member, initiated and grew the club from 5 to 140+ members through outreach and engagement
- Led the organization in the Stop Asian Hate campaign, which raised over \$500 to donate to the AAPI community
- Spearheaded multiple successful collaborations with NSBE and SHPE to promote inclusivity

RESEARCH

Privacy-Preserving Genomic Diagnosis (Advisor: Dr. Wooyoung Kim)

Sept. 2024 - present

- Analyze scalability of homomorphic encryption using mock data, measuring memory and encryption time
- Utilize the TenSEAL library to apply homomorphic encryption on genomic datasets, preserving data privacy
- Achieve 90% accuracy with logistic regression on encrypted genomic data using the CKKS encryption scheme

SKILLS

Certifications: Microsoft Azure Fundamentals (AZ-900)

Languages: Python, Java, C++, Javascript, CSS, HTML, MatLab, SQL, Bash, R

Dev Tools/Libraries: Git, Pandas, Sckit-Learn, Visual Studio Code, React.js, Spark, MapReduce, MPI
